

Service and consulting

Logistics – Tailor-made concepts

We gladly advise you individually and continuously work on new concepts for cost optimisation. Our consultants and employees are continuously trained in order to be able to offer you optimal logistics solutions corresponding to your requirements.

We will be glad to advise you on any questions which might come up on the subjects of transport and logistics.

In addition to our professionally trained employees, the efficient communication technology and warehousing logistics are one of our prerequisites for trouble-free transport-logistical work.

- Competent consultation by logistics our specialists
- The most modern technology
- Modern warehousing
- Euro-pallet sales

Logistics, Scheduling

... competent with the most modern technology

DEUFRANCE advises, plans and implements logistic projects of every size in close consultation with the customer. From simple transportation to comprehensive »just in time«-solutions with overall responsibility.

- **Professional scheduling**

All the employees on our friendly team are multi-lingual (German, French, Polish, English) and have long years of experience in lorry scheduling. In this way, every enquiry can be answered quickly without delay and a problem is solved immediately.

- **The most modern communication**

Over 90 contractual lorries are centrally loaded by our Scheduling Department using the most modern communication technology. All scheduling agents can be reached directly.

Our contractual companies are all equipped with mobile communications.

Convince yourself – we look forward to your visit!
